

Guessinggame error

Syntax

```
19 System.out.println("Player's Number: " + playerNumber);
20
21 while
22 {
23     (playerNumber != secretNumber);
24     System.out.println("Enter a number between 1 and 20: ");
25     playerNumber = UserInput.nextInt();
26 }
27
28
```

```
while(playerNumber != secretNumber)
{
    System.out.println("Enter a number between 1 and 20: ");
    playerNumber = UserInput.nextInt();
}
```

Firstly I added a condition to the while statement and removed the ; to complete the error.
