Digit extractor errors log

Cannot work since there isnt a lower case method, if user enters upper case there will be an error

```java
        System.out.println("Show (H)undreds number. ");
        System.out.println("(Q)uit. ");

    |
        char choice = choicestr.charAt(0);

        //Start While loop to keep coming back to options until use
         choice = ' ';

    // when user chooses W Q T H these following cases will occur
```
